Mr. Bill Pfister
California Regional Water Quality
Control Board
3374 East Shields Ave., Room 18
Fresno, CA 93726

Dear Mr. Pfister:

Attached is an application from Getty Oil Company to conduct a water disposal project in the Santa Margarita zone in the Central area, Tejon field.

The operator proposes to drill well No. WW-1 and convert well "Butler & Long" 15-27 to injection. Additional details are:

1. Overlying geology - interbedded sands and silts
2. Analysis of injection fluid - $\approx 3,200$ TDS. Fluid is produced H_2O from zone of injection.
3. Analysis of injection zone - $\approx 3,400$ TDS.
4. See attached for well locations and project area.
5. Except for the two concerned wells (WW-1 and Butler & Long 15-27), there are no other wells in the project area.

Additional supportive data, which are interpretive and therefore confidential, are available for your inspection at this office.

The proposed injection zone has been exempted by the EPA.

Please submit to this office any comments you may have on this proposed project. Your comments are due within 14 calendar days from the date of this letter.

Yours truly,

David Clark
Associate Oil and Gas Engineer
